Our Vision

Our STEM program assess the immediate need for the schools within the marginalized communities to prepare students for future STEM opportunities that do not yet exist.

To schools, community organizations and parents, we're a solution that is available to prepare students for future STEM opportunities.

The STEM program provides a comprehensive curriculum comprising of science, engineering, computer programming /coding, math, robotics and automation and business programs for school-aged children through summer camps, track out camps, afterschool programs, weekend classes and classes in and outside schools.

Why Register

We provide instructor-led online courses.

We have a comprehensive line-up of STEM curriculum.

We have a flexible Program Delivery.

We provide different courses to cover a variety of core ideas.

Our Program

FUN AND ENGAGING

We provide custom STEM activities and bring activities that fit your goals for in-school STEM enrichment. Custom Program Delivery – online (virtual) instructor-led classes, afterschool, before-school, workshops, regular STEM classes or camps.

STEM COACHES

Our instructional staff and STEM Coaches are trained on curriculum content and the 4-Dimensional Learning method to provide a fun learning experience for students. Each coach is background checked to ensure safety.

FAMILY ENGAGEMENT

During the school year and beyond we give families tools, resources and opportunities to support their children's development.
